

ZOOMLION® QY50V

ZLJ5410JQZ50V

All Hydraulic Truck Crane performance specification

- Superstructure is manual proportion control. It has possessed some traits, such as predominant performance, simple structure and convenient for maintenance.
- By one section outrigger beam, the span is large and stability is excellent.
- The outrigger beam, which can be half extended, is flexible for operation.
- Electric-control double sides manipulation of the outrigger beam makes operation convenient.
- Compared with the common engine, Steyr energy saving engine with large power can help to save ten percent of energy while vehicle is running in middle/lower speed.
- The 5th outrigger contracted to position sound-and-light warning device locates in the driver's cab.
- Electro-accelerator technology registered in national patent makes operation more relax.

Table of Main Technical Performance and Specification

Working performance specification	Max. rated lifting capacity	kg	55000
	Max. lifting moment with basic boom length	kN.m	1764 1470 (When outrigger beam is half extending)
	Max. lifting moment with max. boom length	kN.m	940.8 793.8 (When outrigger beam is half extending)
	Basic boom max. lifting height	m	11.6
	Boom max. lifting height	m	42.1
Working speed	Jib max. lifting height	m	58.3
	Single line max. hoisting speed (main & auxiliary winches)	m/min	124
	Lifting boom extending time	s	95
	Lifting boom elevating time	s	55
Traveling specification	Slewing speed	r/min	0 ~ 2.3
	Max. traveling speed	km/h	75
	Max. gradeability	%	32
	Min. turning radius	m	12
	Min. clearance	m	0.26
	Free accelerating emission limit	FSN	≤2.5
Mass specification	Oil consumption/per 100 kilometers	L	40
	Self-weight in traveling condition (gross)	kg	40600
	Complete vehicle kerb mass	kg	40405
	Front axle load	kg	14850
	Tandem & rear axle load	kg	25750
Dimension specification	Overall dimensions(L × W × H)	mm	13300x2750x3650
	Outrigger longitudinal span	m	5.92
	Outrigger transversal span	m	6.90
	Boom length	m	11.1 ~ 42.0
	Boom angle	°	-2 ~ 80
	Jib length	m	9.5 ~ 16.0
Chassis	Type		ZLJ5412
	Engine Type		WD615.44
	Engine power	kW / rpm	235kw/2200r/min
	Rated output torque	N.m / rpm	1250N.m/1300 ~ 1600r/min
	Manufacturer		Puyuan company, Zoomlion
	Hydraulic oil brand		L-HV32

More choices which can satisfy more requirements

- Electro-hydraulic proportion control fixed on Superstructure control is optional. Main hydraulic elements are imported.
- The optional GPS locating system which can not only confirm the vehicle's location via satellite, but also long-distance and real-time monitor the equipments'operation condition and parameter, so when fault occurs, the solution can be provided.
- Single cool air conditioner and the heater fixed in superstructure are available as option.
- The interphone, which can realize the convenient contact between operator and commanders, is available as option.

Fall	12	8	8	6	4	4	3	Fall		1		

Note: 1. Above working condition is all with outrigger fully extended or half extending, never lift a load on the wheels.

2. Capacities above the thick line in the table are based on the structure strength of the crane, the others, on stability of the complete machine.

3. Set up the 5° outrigger, it is suitable for 360° operation.

4. The values in the table are the Max. permissible values and include weight of the hook, (the main hook is 510kg, the auxiliary hook, 120kg).

5. A working radius given in the table is a horizontal distance from the centerline of the hook to the axis of the slewing ring when the hook is loaded.

6. When actual boom length and working radius are between two values, determine lifting capacity according to bigger boom and radius.

7. Rated lifting capacity should exclude the weight of clings and self-weight of jib (2000kg), when boom is used with jib extended.

Set up the 5° outrigger, it is suitable for 360° operation.
